In November of 2009, I had prior health conditons that kept me bedridden at least until **5:00pm in the afternoons.**

At that time **I was diagnosed with Stage 3 breast cancer.**

Knowing that I would possibly die from chemotherapy and surgery, **I went to the Century Wellness Clinic in Reno.** That is where I was treated and earned about PMVA from Dr. James Forsythe.

I was placed on **supplements along with PMVA.** After the treatments **I stayed on using PMVA when I went into remission.**

Within 4 months and **taking PMVA daily I have been able to get up earlier in the day and remain in remission.** I truly believe that **with out the PMVA I would not be alive today or be able to get up earlier in the day.**

Having severe reactions to chemicals, **I couldn't have standard cancer treatments.** Were it not for **PMVA, there would have been no hope for me.**

I have hope now and even if people have had standard treatment for cancer, **I feel that the PMVA does wonderful things in helping the immune system fight.**

I would definitely recommend PMVA to others. AMARC Enterprises has been so helpful and knowledgeable on questions I've had. They are truly caring towards me and all individuals. As I said, **I feel that PMVA is a life saver.**

I have been **on Poly-MVA for a while now**, and because I am on alternative treatments, I never had chemo or surgery. **I feel the Poly-MVA is the reason I am in remission** and if i stay on it, **I feel I will live longer.** Thank you so much!

Lupe

11-16-2012

Lupe said that **her levels have been steady since 2010.** Took Poly and Oracel together. Then after 8 months, she stopped the Oracel since she didn't see good results and started using only Poly, Vitd3 and magnesium.

PMVA has been helping with her pre-existing condition with her ear in 1995. She believes **because of Poly she has been able to get up earlier.** She was not able to lift her head now she does. This was caused from chemical poisoning with pesticide spray...exposure...

She thinks using PMVA has helped with those systems. Lupe will have another PET scan at the end of the month.

8-06-2014

Lupe recently has **had another relapse** so will take another round.

She has been on **Poly for several years and is planning to go to Dr. Fosythe's again where she will get Poly MVA via IV treatments.** She has been taking Poly since 2010.

1-28-2019

Lupe started back on 8 tsp daily of Poly MVA due to another relapse.
