Available**

I **began using PolyMVA a few weeks prior to surgery** (rectum removed) which helps account for my **quick recovery** and the **clarity of mind** and a **sense of well being** that followed. It was as if every cell in my body had received a tonic.

Surely the prayers to and faith in the great physician by my family and my doctors are key to healing. I appreciate the Foundation for researching cancer and its possible cures.

PolyMVA at the very least **helped minimize the effects cancer had**. I pray that soon it will be assisting others in this fight against this dreaded disease.

Thanks to the results from PolyMVA, **I plan to continue its use** and praise god for its availability.

Thank you!

Roger Orr

**10-05-2009**

Talked to Roger. He is doing well. His surgeon told him that they believe they **got all the cancer during the surgery** and the doctor **did not recommend chemo or radiation**.

**2-10-2010**

Roger is doing well. He still gets up every morning goes to **help out at the convalescent hospital** and does **bible study with prisoners daily**. He will go next week for more blood work.

**6-06-2012**

Spoke to Mr. Orr and all is going well. He **continues to take a maintenance dose**.

**10-20-2016**

Mr. Orr has just **turned 80 years old** and **is still taking Poly MVA**. Says he feels good and is doing well.

**5-23-2017**

Called Roger to see how he was doing. He is **still in remission after all these years** and still taking 1 tsp a day of Poly. He appreciates our keeping in touch.
