In Feb 2006, I was diagnosed with **inoperable stage 3B lung cancer**. As a nonsmoker and **registered nurse** I felt I was living a healthy lifestyle. I was **given 4-6 months to live** and encouraged to **get my affairs in order**.

A doctor friend, **interested in integrative medicine and research**, started me on a supplement plan while I was receiving chemotherapy. The goal was to **enhance the effectiveness of the chemotherapy**. The fatigue associated with cancer and its treatment is very debilitating.

The **strength would drain from my body** and I felt as though if **I didn't lie down**, I would fall down.

My doctors suggested I try Poly-MVA and **within weeks** I had **increased energy** and **felt strong for periods of time** during the day. My strength continued to improve and before long **friends and family were telling me how healthy I looked**.

In Feb 2011, I **passed the five-year mark** and am **grateful to Poly-MVA for restoring my health**.

Mary Ellen

4-15-2010

Called Mary Ellen and she called back to **let me know she is doing well**. She said that she will have a scan 1st part of May and more blood work tests to see where she is at.

4-10-2011

In February this year, Mary Ellen passed 5 years being in remission. She had another scan in the beginning of April and **all is good**.

6-13-2012

Talked to Mary Ellen and she is **going through Chemotherapy again**. Unfortunately, the **cancer in her lung has started growing again**. She said she had Radiation treatments in October of 2011. Her **PET scan in March of 2012 still showed some nodules**. She has been receiving IV Poly treatments from Dr. Kotowski and has been **tolerating her Chemo very well**. She still believes strongly in Poly and continues to use it because she says it **helps with her energy and recovery** after each round of chemo.

11-14-2012

Mary Ellen said she will call back **when she is ready to use Poly MVA again**. She will have another CT scan to see what her results are and go from there.
