I've been on **Poly MVA** for a **year and a half** for **MALT Lymphoma** in the **stomach**.

My last blood results in November **showed that I am in complete remission**. The doctor said I am doing well so I will continue to use the Poly MVA.

I only wish the Poly wasn't so expensive, as being single and working full-time, it's hard to pay for Poly. If I weren't on the **Poly Life Study** and **getting the reduced price for Poly**, I would not be able to afford it.

Spoke to client and **says nothing has changed** since her testimony in 2007; she **continues to use Poly-MVA** but has nothing new to add.

2-19-2017

Christine is still taking Poly-MVA.
