February 15, 2009

In September of 2007, I was diagnosed with Stage II ovarian cancer - an 18cm mass, large amount of fluid in the pelvis and abdomen, (Acitis) and right hydronephrosis, underwent a radical hysterectomy, bilateral salpingo-oophorectomy.

Postoperative diagnosis: **Metastatic uterine cancer with secondary metastatic disease to right ovary.**

My doctor recommended 18 months of chemotherapy. Not wanting this chemical and toxic invasion of my body, I did some research and learned about Poly-MVA. **I began taking the supplement in December of 2007** [as a part of the Quality of Life study] while I was still recovering from surgery and looking emaciated from about 48 lbs of weight loss due to the cancer.

What happened to my body within 2 weeks of starting Poly-MVA was nothing short of "amazing." My energy level shot up and my appetite increased to where I started gaining back my muscle tone and weight because I was able to eat very well and had no digestive problems. I am continuing with the Poly-MVA program which I use with CoQ10, coral calcium, liver cleanser, vitamin D3, flaxseed oil and organic fruits and vegetables.

On 5/1/08 I had a CA-125 test done which came back with a less than 1.0 reading. This product has kept me alive so far, without the destruction of the chemotherapy. I look and feel terrific.

I would like to acknowledge Gary Matson with AMARC Enterprises who got me started with the Poly-MVA. I also want to acknowledge the research coordinator, Dr. Jorge Llamas, whom I had the pleasure of speaking with many times when I had questions. He always made time to speak with me. **The staff at AMARC was also very helpful and accommodating.** My thanks to the manufacturers of this product and those involved in getting it to the patients and monitoring their success.

Respectfully,

Nancy Beckles

Update: June 24, 2010

Nancy let us know that she is still taking poly once a day, coral calcium, vitamin d , lymph cleanser, CoQ10, liver cleanser, flaxseed oil, vegetables and fruits and exercises three times a week. **She went for ca125 test that came back negative.**
