In my I was **diagnosed with prostate cancer in Feb of 2002**. My PSA had been monitored and climbing for years prior, but needle biopsy did not find it until 2002. I altered my eating habits, used hyperthermia and chelation for mercury and **finally in 2008** went to valley cancer in Los Angeles for **hyperthermia and low dose of radiation**.

I never felt bad and stopped working, but in **2010 I consulted Dr. Paul Rothwell** of Oklahoma City **because PSA rose**.

He put me on **Poly-MVA -6 tsp daily**.

In past **2 years I have taken Poly-MVA every day up to 12 tsp then back to 8tsp**. My PSA has fluctuated but **all MRI's show good results**. I feel wonderful and do very physical labor at age 70.

I attribute **my energy and well being to Poly-MVA** and my faith in God. Dr. Rothwell also gave me 100mg IV, and Vitamin C weekly. All things work together for good to him who trusted God.

Thank you for helping me with Poly-MVA
